Re: POSTAL REGULATORY COMMISSION [Docket No. N2021-1; Order No. 5848] Service Standard Changes

Postmaster General De Joy has done his best to eviscerate the postal service during the recent election. He now proposes to undermine the USPS which is critical to holding our country together.

Senior citizens like I depend on the USPS for timely delivery of critical medications. Packages for birthdays, documents for business, letters of sympathy and concern must be delivered on time.

We have relatives in rural Colorado and depend on the USPS to keep us together across all the miles that physically separate us.

The founding fathers knew the importance of having a postal service, critical to holding the country together.

It's the Postal Service; it's not the Postal for Profit Delivery. If De Joy can't maintain or improve service, than he is not qualified to run the USPS. My recommendation is dump De Joy; keep the service in the USPS!
